

# Lockheed Martin Hercules

The most versatile military transport aircraft ever built, the C-130 Hercules has been in continuous production for more than half a century and has seen service with more than 50 different air forces around the world. No other aircraft has shown such continuous durability and her adaptability has ensured that the Hercules in all her many manifestations is the ultimate success story of aviation and military design. Originating in the 1950s when the USAF needed an aircraft with heavy cargo lifting ability, troop-carrying capacity, and the ability to operate safely from the most primitive of runways, the Hercules has appeared wherever there has been a crisis, war, or emergency. In combat, no matter whether in tropical jungle, desert landing strips, or almost-impassable terrain, the C-130s homely and familiar profile has arterialized where she was most needed. From the icy wastes of Antarctica to the earthquake-stricken island of Haiti in January 2010, the aircraft has arrived on the scene laden with medical and emergency supplies, aid teams, and heavy lifting gear. This is the full story of the Hercules and a faithful record of all her exploits over half-a-century, in her many guises, from gunship in Vietnam, to flying hospital in Arabia, and is fully illustrated with many original color and black-and-white photographs. All Hercules types and many foreign air forces and civilian operators are covered, including their varied uses and multiple roles. This complete aircraft history also contains a type listing, details of sub-contractors, exhibits and museums, together with color aircraft profiles which combine to make The Lockheed Martin Hercules essential reading for the aviation enthusiast or historian.
