

KILL TYPE 2 DIABETES: How I defeated this monster

Type 2 diabetes is a monster causing mayhem and misery wherever it has become established. This monster can be stopped, this monster can be killed. I have experienced the deadly grip of this monster but luckily I managed to escape. I call Type 2 diabetes a monster, but it has also become a major terrorist, crossing international borders with ease. Border controls have been neutralised because the population have been tricked. This monster has found a way of sneaking up on the human race and attacking us. This terrible scourge is attacking you and your family as you read this book. This Terrorist has got so sophisticated, that entire towns have become his (her) agents or allies. Remember Count Dracula, how he was able to trick people to help him. Type two diabetes has learned from Count Dracula. I wrote this book to proclaim the message; firstly that Type 2 Diabetes is well entrenched. Secondly he will not give up without a major fight and thirdly to help turn his agents against him. The information in this book is not new. The information is not rocket science. The way to kill type two diabetes is easy if the correct weapons are used. The key weapon is education. If we all know how; we can become the conquerors of this monster. In another time, a horseman called Paul alerted his country by using a horse as leverage. Paul my namesake proclaimed that a major enemy was coming to attack them. Now in the 21st century another Paul is alerting all the nations that a deadly force has arrived and it is attacking. I am not using a horse as leverage instead I am using a keyboard. If the pen is mightier than the sword as often quoted, then maybe in the 21st century a computer is a mightier than an army. Most people are not aware about Type 2 diabetes because this monster has special camouflage rendering it almost invisible. This enemy is in stealth mode like a Klingon bird of prey sneaking up on

us to turn our bodies against us. Type 2 diabetes can be like a vampire's bite slowly turning you into another victim. Once bitten by Type 2 diabetes your blood becomes toxic. The degree of toxicity from the first bite is mild, you probably will not experience any pain. In fact you probably will not notice you have been bitten; but slowly, very very slowly; over time your body gets worse. As you become worse type 2 diabetes becomes stronger. A strong type 2 diabetes invites his nasty neighbours to gatecrash your life. His nasty neighbours include; depression, itchiness, soreness, neuropathy, foggy brain syndrome, misery, and, loss of money. The major problem for us humans is; we are not naturally designed to combat the bite of type 2 diabetes; our immune systems have not been configured to cope with the poison which has been deployed against us. Let me alert you to this danger; let me help you protect your family; Let me help you protect your community. Let me help you Kill type 2 Diabetes
